Hi Ryan,

(b) (6) so am now getting caught up on this and your other emails. Thanks for sending everything along!

Laura

Hi Laura,

The Mid-Coast is big but the area for this project is not the entire Mid-Coast. I will send the shapefile and list later today (I'm not at work right now).

Also I finished loading the hardrive with all the LiDAR and watershed outlines last night. Note this includes the vegetation data for Kevin Brannan's project. It should go out in the mail today. I asked our support staff to send it so it is guaranteed delivery by Monday morning but I can ask for next day air if you want it that soon. Let me know.

And I haven't forgot about the Landsat write up. I'm will send that Monday.

Hi Ryan

I know you are sending us the data via mail. However, can you let me know via email (today, if possible), the order of sub-basins for prioritizing this work? My staff took a quick look at the size of the Mid-Coast Basin, and it is quite large. This is definitely more work that we can get done by 4/30 (or 5/14 if we get the extension). However, our current thinking is that we can develop a solid protocols document (with your input and feedback) and then implement those protocols and perform the road mapping for as many of the sub-basins as we can get through by 4/30 or 5/14.

Thanks,
Laura

Hi Laura,

The LiDAR rasters for the road digitization project are quite large so I'm going to have to send you a harddrive in the mail. What address should I send everything to?
